Goal: Providing Client Advocacy and Ultrasound Services to Pregnant and Parenting Women

For the period: 10/1/2015 – 12/31/2015

Activity or Service	Activity or Service Description <small>Major Work Plan Activities</small>	Work Plan Count	Program Progress and Accomplishments <small>Report the progress and accomplishments made this period on each activity.</small>	Report Count
Case Management Services	Provide ongoing follow-up for clients tested 'positive' for pregnancy	60	There was decline in the number of pregnancy tests that were performed during this period of time, which explains the drop in GMS for this quarter.	44
Crib Distribution/ Sleep Safety Education	Provide safe sleep education to clients receiving pack-n-play from Cradle of Hope	10	We were able to successfully work with women and their families to receive Pack n' Plays from Cradle of Hope and receive safe sleep education. They also received handouts and take home materials to reinforce the education they received.	12
Financial Assistance	Assist completing financial aid and Pack and Play applications	25	Although our numbers for Case Management were down, we were right on target with Financial Assistance. The holiday season was a very difficult time for many of our clients and we were able to successfully help them with this form of financial assistance.	25
Material Support	Provide diapers, infant formula and infant clothing	50	Our material assistance program was incredibly popular this past quarter. In September we began increasing the amount of material assistance that we provide to our clients, allowing them to get more each time they come in. Also, we successfully partnered with other organizations and private donors over the past quarter to increase the amount of material assistance was donated – allowing the increase in generosity of this program.	242

Activity or Service	Activity or Service Description Major Work Plan Activities	Work Plan Count	Program Progress and Accomplishments Report the progress and accomplishments made this period on each activity.	Report Count
Nutrition	Provide prenatal vitamins to newly pregnant women	35	The decrease in this number can be attributed to the decreased number of pregnancy tests performed this quarter. Every positive pregnancy test is offered prenatal vitamins.	30
Pregnancy Testing	Provide pregnancy testing, assessment for program eligibility and counseling	90	Although this number is higher than our work plan, we did see a decrease in the amount of positive tests this month.	92
Provide Necessary Services Assessments Only	Staff provides clients only intake assessments, information on, referral to and assistance with securing necessary services	5	We have experienced a decrease in the number of volunteer pregnancy counselors over this quarter, therefore the majority of pregnancy tests were performed by our staff. This number typically reflects use of our volunteer pregnancy counselors with staff follow-up which was reduced due to the decrease in number of volunteer counselors (retirement, scheduling conflicts)	1
Ultrasound	Provide early limited ultrasound to determine gestational age	30	Due to the decrease in positive pregnancy tests, resulted in lower ultrasound numbers this quarter. We continue to offer a full day of ultrasounds each week, and typically this day remains quite full. We also have the option to add another day as needed, if the demand is increased.	25

Maternal and Child Health Initiative Task Force Strategies		No.
Number of women who received car seats and car seat safety education from a PA funded program activity		0
Number of women who received car seat safety education only from a PA funded program activity		0
Number of women who received child abuse prevention education from a PA funded program activity		0
Number of women who received abusive head trauma (shaken baby) prevention education from a PA funded program activity		6

Maternal and Child Health Initiative Task Force Strategies		No.
<i>Number of women who received a baby bed, crib, or pack-n-play and sleep safety education from a PA funded program activity</i>		12
<i>Number of women who received sleep safety education only from a PA funded program activity</i>		0

Challenges:

Comments: We increased our shaken baby prevention education in this quarter and plan to continue in 2016.
